Bachelor of Science in ITM/Computer Science

Program Description

This is a dual degree only program with Fort Hays State University (FHSU). The FHSU award Bachelor of Science in Computer Science.

The Information Technology Management (ITM) program is designed to develop professionals in emerging and converging information and communication technologies. A degree in ITM produces graduates who can organize business processes to support the strategic corporate needs, demands and goals at the management level. The program is designed to bridge the gap between problems of business and the capabilities of information technology, while aligning the technology with business strategies. Students enhance their critical thinking, problem solving, and analytical skills with knowledge of management principles. The program is a balance of technology, management, communications and the liberal arts.

In addition to General Education requirements of the university, The ITM major will require 45 units of advanced study plus 15 units of electives for completion of a chosen minor or concentration. Students in ITM are also required to complete co-requisite courses in math (algebra, calculus, and/or statistics), and lab courses in science. Completion of the program will also require demonstration of technical writing ability, a senior project, and an internship.

Program Learning Outcomes

Knowledge

- (<https://www.aupp.edu.kh>)
- PLO 1. Demonstrate comprehensive knowledge of computer science theories, algorithms, and programming languages, forming a solid foundation for versatile problem-solving.
 - PLO 2. Acquire expertise in computer science fields, enabling them to efficiently organize, manage, and manipulate data, facilitating informed decision-making and innovation.

Cognitive Skills

- PLO 3. Cultivate strong critical thinking and analytical skills, enabling them to approach complex IT management problems with creativity and adaptability.
- PLO 4. Develop effective communication and teamwork abilities, facilitating collaboration in multidisciplinary environments and enhancing IT project success.

Interpersonal Skills and Responsibility

- PLO 4. Develop effective communication and teamwork abilities, facilitating collaboration in multidisciplinary environments and enhancing IT project success.

Numerical, IT, and Communication Skills

- PLO 6. Excel in numerical analysis, leverage information technology proficiently, and communicate complex technical concepts effectively, enhancing their career readiness.

Psychomotor Skills

- PLO 7. Develop practical hands-on skills, showcasing proficiency in technical tasks, laboratory experiments, or practical applications relevant to their specific field.

Career Opportunities

Students are prepared for positions in technology and management fields, such as, for example, local and national government, telecommunications, financial institutions, corporate or educational IT units, private business and NGO's. Graduates will have the necessary knowledge, experience and skills to enter technology related careers in business and management. Job opportunities include, but are not limited to: business, management and systems analyst; IT and project management; IT director; information management specialist; database or web administrator; network administrator; software or computer applications specialist; IT security officer; and, data scientist.

Bachelor of Science, Information Technology Management

Program Structure	Required Total Credit (121)
General Education	46
Information Technology Major	56
Electives	19

General Education Courses (Required 46 credits)

Information Technology Major Courses (Required: 56 credits)

Foundation Courses

Course Code	Course Name	Credit
MATH 234A	Analytic Geometry and Calculus I	5
ITM 340	Maths for Computing	3

Major Courses

Course Code	Course Name	Credit
(https://www.aupp.edu.kh) CSCI 111	Survey of Computer Science	3
CSCI 121	Computer Science I	3
CSCI 221	Computer Science II	3
CSCI 241	Foundations of Computing	3
CSCI 251	Data Structures	3
CSCI 321A	Assembly Language	3
CSCI 331	Operating Systems	3
CSCI 421	Programming Languages	3
CSCI 431	Computer Graphics	3
CSCI 441	Software Engineering	3
INF 250	Introduction to Web Development	3
INF 651	Front-end Web Development	3
INF 652	Database Design and Programming	3
INF 653	Back-end Web Development	3
INTS 400	Internship	3
Elective Courses (Required: 19 credits) ITM 201	Java Programming I	3

Graduation Requirements:

Students must have 2.00 GPA in all coursework (AUPP and FHSU). Students must also have 2.00 GPA in all FHSU coursework, 45 hours must be upper-division (numbered 300 and above).
